Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, 13 and 19, drawn to a method of augmenting the actions of cAMP in an effector system while reducing cAMP action in a nociceptive system comprising application of one or more the various forms of NO or CO to site wherein the said cAMP exists.
 - II. Claims 8-12 and 14-18, drawn to a method for enhancing penile or clitoral erection with minimal or no pain comprising administering at least one agent that can augment the effect of cAMP as well as augment the effect of cGMP.

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, Invention II can be practiced with another materially different process of using, for example by modulating Rho-kinase or angiotensin II receptor activity.

Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

2. In addition, if applicant elects Group I invention, applicant is required under 35 U.S.C. 121 to elect a single disclosed species from (i) “the various forms of NO or CO” for example carbon monoxide monotherapy or (ii) combination therapy selected from “the various forms of NO or CO”, for example nitric oxide and carbon monoxide combination, and (iii)

“anatomical site”, for example penis, under the instant claims of the elected Group. Moreover, whatever specific compound and/or disease condition is ultimately elected, applicants are required to list all claims readable thereon.

3. If applicant elects Group II invention, applicant is required under 35 U.S.C. 121 to elect a single disclosed species from (a) “agents augment the effect of cAMP”, for example sodium nitroprusside monotherapy or (b) combination therapy selected from “the various forms of NO or CO” or “agents augment the effect of cAMP”, for example SNP and PGE1 combination, and (ii) “anatomical site”, for example penis, under the instant claims of the elected Group. Moreover, whatever specific compound and/or disease condition is ultimately elected, applicants are required to list all claims readable thereon.

4. With the election of a specific exemplified compound and/or disease condition, a generic concept will be identified by the examiner as the inventive group for examination.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian Kwon whose telephone number is (571) 272-0581. The examiner can normally be reached Tuesday through Friday from 9:00 am to 7:00pm.
